

# NGUYỄN TRỌNG ĐẠT

---

## SKILLS

- Language: Javascript, Typescript, ...
- Frameworks, libraries & others: Reactjs, Vuejs, Firebase, Socketio, react-hook-form, ...
- UI libraries: MUI, Bootstrap, Tailwindcss, ChakraUI, ...
- Databases: MySQL, PostgreSQL, Firebase Firestore, MongoDB, ...
- Have encountered: Vuejs, Nuxtjs, Vuex, vee-validates, Nodejs, Visual Studio (C#), Android Studio (Java), ...

## EXPERIENCE

### **NEXON DEV VINA, UOA Tower** - *Junior front-end developer*

**APRIL 2022 - PRESENT**

- Working full-time as a front-end developer.

### **FREELANCE** - *Remote front-end developer*

**NOVEMBER 2021 - FEBRUARY 2022**

- Working part-time as a front-end developer.
- Implement features and fix bugs based on Figma design and requirement.
- Update and delete records in database with DBeaver.
- Working with other colleagues using git.
- Meeting frequently with the team when tasks are delivered.
- Developing for front-end; implementing, fixing bugs, updating UI, front-end logic using Javascript, Typescript, and React, ...

## PROJECTS

### **BLUEPRINT EXTENSION**

- Overview: Blueprint is a tool for students supported for filling forms automatically on integrated sites by storing user's data, then students use the extension to auto-fill data on other integrated sites.
- Technologies: Front-end using React, back-end using Nestjs(Nodejs), database using PostgreSQL, extension was built using plain Javascript.
- Responsibilities: Work on extension for supporting integrated sites; update and delete records on database; understood code flow for implementing extension in web browsers using plain Javascript.

## MISO-ROBOTICS

- Overview: Miso-robotics is a tool for users to fill forms and data to manage equipment, locations, administrations and tracking progress in general.
- Technologies: Front-end using React, back-end using Loopback (Nodejs), database using PostgreSQL.
- Responsibilities: Implement new features based on Figma design; implement front-end logic; fix designs and bugs based on tasks and requirements.

## REACT-CHAT-APP

- Overview: This project is a small chat app, and a personal project I have built on my own for education during college.
- Implement business logic on front-end; create UI design with Tailwindcss based on personal references; integrate Firebase Storage for storing user's data including videos and files; integrate Firebase hosting for free hosting domain.
- Technologies: Front-end using Create-React-App as an entry React framework; Firebase was used for databases, back-end logic, and hosting; Tailwindcss, and ChakraUI for UI libraries.
- The app is lived at <https://react-chat-app-14bbc.web.app/>

## EDUCATION

### Ho Chi Minh City University of Technology (HUTECH) – BACHELOR'S IN COMPUTER SCIENCE

AUGUST 2018 – APRIL 2022, BINH THANH – HO CHI MINH CITY

- My studies: Initiated programming career, OOP, C/C++, Java, C#, PHP, Javascript, NodeJS, software tools, WPF, Visual Studio, Android Studio, some design pattern concepts, ...
- Current GPA: 3.2 / 4.0
